Experience

Independent / iOS Developer

JAN 2021 - PRESENT, REMOTE

The Racing Line / iOS / iPad / Apple Watch

RELEASED: JAN 2021 - <https://theracingline.app/>

A calendar application which gives motorsport start times and notifications in your local time zone. Developed using Apple's latest frameworks and technologies. Includes over 50 motorsport series, with user customisable options. Custom backend generates JSON files, served via a REST API to the users. Over 4000 downloads and over 100 active paying subscribers. Version 2 is in development

Stuc / iOS / iPad / Apple Watch

IN DEVELOPMENT

Currently in development, a hiking application to lower the barrier of entry to hill walking and trail running in Scotland

Waracle / Head of IT

NOV 2021 - PRESENT, REMOTE

Technical Ownership of Waracles digital estate, including all hardware and software systems. Overseeing the account management and technical support of our internal development teams. Automating business processes via Google Script and custom SlackBots to reduce resource requirements and ensuring high quality services. Leading the Support Team in the internal day to day operations. Device management for over 400 Apple devices. Financial and budget control over the entirety of Waracles digital estate.

In addition to the Head of IT role, I have also been assisting delivery with support requests, bug fixes and feature development for client iOS applications.

Waracle / IT Manager

NOV 2020 - NOV 2021, DUNDEE

Overseeing the account management and technical support of our internal development teams. Automating business processes to reduce resource requirements and ensuring high quality services. Leading the Support Team in the internal day to day operations. Device management for over 400 Apple devices.

Waracle / IT Associate

NOV 2019 - NOV 2020, DUNDEE

Overseeing the account management and technical support of our internal development teams. Automating business processes to reduce resource requirements and ensuring high quality services.

Petrofac / Major Emergency Management Instructor

NOV 2013 - NOV 2019, MONTROSE

Creation of bespoke Oil & Gas and Renewable energy simulations for training of Control Room Operators in Emergency Response and Crisis Management

Personal

In my spare time I enjoy hiking, climbing and trail running. I'm a motorsport addict, especially for endurance racing, and regularly attend events. I'm also an avid podcast listener and technology enthusiast.

I'm also proactively keeping up with Apple's latest development trends. I watch relevant WWDC videos each year and am active in the Waracle iOS Community.
